

ATMA RAM SANATAN DHARMA COLLEGE (UNIVERSITY OF DELHI)

Equal Opportunity Cell

The College remains steadfast in its mission to foster an inclusive, accessible, and equitable learning environment. In this regard, the Equal Opportunity Cell/Enabling Unit plays a pivotal role by ensuring that students with disabilities have the necessary academic support, physical infrastructure, and emotional encouragement to thrive.

The Cell's primary objective is to create an educational ecosystem where every student feels empowered, respected, and valued regardless of physical or sensory challenges. It promotes awareness, sensitisation, equal access, and non-discrimination through a series of institutional measures such as establishing a dedicated reading hall in the Library, equipped with audio-visual aids and internet access to facilitate accessible learning for visually impaired and differently abled students. Steel Braille Signage has been installed across campus to enable independent mobility, and reserved parking spaces have been added to improve physical access to college facilities further.

Several initiatives are in the pipeline, including the implementation of screen-reading software across all computer labs, the creation of a resource centre with assistive technologies such as Braille printers and tactile learning tools, and the organisation of sensitisation workshops and awareness drives for students, faculty, and staff. The Cell also plans to launch a peer support and mentorship program to foster inclusivity at a personal level. Through such comprehensive efforts, the institution continues its commitment to cultivating a compassionate, inclusive, and empowering academic community.
