## Scope of Conference

Functional materials play a pivotal role in advancing human development through a wide range of cutting-edge technologies. Given their rapid progress and vast potential across diverse applications, numerous national and international conferences have been organized to bring together scientists, researchers, academicians, and industry experts to deliberate on recent developments in multifunctional materials. With this vision, the conference also aims to explore how interdisciplinary research across various branches of materials science significantly strengthens and enriches the knowledge ecosystem. In continuation of this effort, we cordially invite you to participate in the **3<sup>rd</sup> Online International Conference on Recent Advances in Functional Materials (RAFM-2026)**. We believe that RAFM-2026 will serve as a dynamic platform for meaningful discussions, knowledge exchange, collaboration, and innovation—making it a novel, enriching, and intellectually stimulating experience for all participants.
